

Global Water Resources to Present at the Bank of America 2022 Water Conference on December 6, 2022

PHOENIX, AZ – November 29, 2022 – Global Water Resources, Inc. (NASDAQ: GWRS), (TSX: GWR), a pure-play water resource management company, has been invited to present at the Bank of America 2022 Water Conference being held virtually on December 6, 2022.

Global Water Resources CEO, Ron Fleming, is scheduled to participate in one-on-one meetings with institutional analysts and investors held throughout the day. He will be joined by the company's SVP and CFO, Mike Liebman, and chief strategy officer, Chris Krygier.

Management will discuss how organic and acquisitive growth helped drive regulated revenues up 8.9% to \$33.6 million and net income to \$4.7 million or \$0.20 per share in the first nine months of 2022. They will also review the company's recent [regulatory rate increase approval](#) that is expected to add over \$2.2 million in revenue on an annualized basis.

They will also talk about recent developments at the [Inland Port Arizona](#) mega-site where Global Water will be working with Procter & Gamble to provide water, wastewater and recycled water services to P&G's [new manufacturing facility](#).

To schedule a one-on-one meeting with management, please contact your Bank of America representative. For any questions about the company, contact Ron Both of CMA at (949) 432-7557 or submit your request [here](#).

About Global Water Resources

Global Water Resources, Inc. is a leading water resource management company that owns and operates 25 systems which provide water, wastewater, and recycled water services. The company's service areas are located primarily in growth corridors around metropolitan Phoenix. Global Water recycles over 1 billion gallons of water annually.

The company has been recognized for its highly effective implementation of Total Water Management (TWM). TWM is an integrated approach to managing the entire water cycle that involves owning and operating water, wastewater and recycled water utilities within the same geographic area in order to maximize the beneficial use of recycled water. It enables smart water management programs such as remote metering infrastructure and other advanced technologies, rate designs, and incentives that result in real conservation. TWM helps protect water supplies in water-scarce areas experiencing population growth.

Global Water has received numerous industry awards, including national recognition as a 'Utility of the Future Today' for its superior water reuse practices by a national consortium of water and conservation organizations led by the Water Environment Federation (WEF).
